# Alarm QuickStart Guide

How to Arm Your System In "Away" Mode

AWAY is utilized when the user is going away from the premise and wants the perimeter and interior protected. Listed below are the steps to arm in the AWAY Mode:

Step 1: Close all protected doors and windows

- *The ready green check mark right of LCD screen* will be on when all protected zones and sensors are secure. **NOTE: If any zones are bypassed, a sensor in that zone can be violated without affecting the *ready light*.**
- The security system will not arm if the *ready light* is off.

Display Should Say:

| System is
Ready To Arm |
|---|

If not, a zone is faulted and you need to make your system ready to arm (by closing all protected doors & windows)

Step 2: Press & hold the [Away] Key until keypad beeps & starts arming

Step 3: Leave the premise within <u>60</u> seconds through you entry/exit door(s):
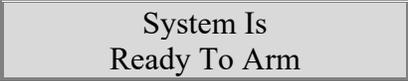

_____ _____ _____ _____

How to Arm Your System In "Stay" Mode

STAY is utilized when the user is inside the premise and wants protection around the perimeter. The steps to arm in the STAY Mode are as follows:

Step 1: Close all protected doors and windows

- *The ready green check mark right of LCD screen* will be on when all protected zones and sensors are secure. **NOTE: If any zones are bypassed, a sensor in that zone can be violated without affecting the *ready light*.**
- The security system will not arm if the *ready light* is off.

Display Should Say:

| System Is
Ready To Arm |
|---|

If not, a zone is faulted and you need to make your system ready to arm (by closing all protected doors & windows)

Step 2: Press & hold the [Stay] Key until keypad beeps & starts arming

Step 3: Leave the premise within <u>60</u> seconds through you entry/exit door(s):

_____ _____ _____ _____

Or

Stay inside

<u>*Optional:*</u> After pressing & holding the [STAY] key (as listed above), press *9 + 4-digit code to make all entry/exit doors instant rather than delayed.

How To Disarm You System

When you enter the protected area through one of the designated Entry/Exit doors, the keypad control will sound a continuous tone for the duration of the entry delay time, or until you enter a valid code.

Display Will Say:

Type Code To
Disarm

Step 1: Enter a valid 4-digit user code.

Step 2: *The red armed light (Lock Symbol) will go off and the tone will stop. The security system is now DISARMED. If a valid code is not entered before the end of the entry delay, an alarm will occur and the system sounders will sound.*

How to Bypass Zones

If you wish to bypass one or more zones, this must be done while the system is in the disarmed state.

Step 1: Press right arrow until the 'bypass' option appears and then press *.

Step 2: Scroll by using the arrows and press * on desired zones to be bypassed.

Emergency Activation Keys

Fire Key - You can activate the Fire alarm by pressing and holding both fire buttons with the fire symbol (top emergency buttons). This alarm will activate all sounders. *This key should only be pressed in an emergency requiring response by fire department personnel for fire & medical attention.*

Police (Panic/Hold-Up) Key - You can activate the police panic alarm by pressing and holding the panic buttons with the police symbol. This alarm will activate all sounders. *These keys should only be pressed in an emergency situation requiring immediate response by law enforcement personnel.*
